NEW PRODUCTS

ASFARI

ELSTAR x DELCORF

- > **Early variety**, harvested about 1 week before Delcorf, 3 weeks before Gala/Elstar
- > Average size 70-85 mm, globose fruit, uniform in shape and size
- > **Yellow** skin with occasional pink blush, small pronounced lenticels, Golden-type
- > Sour-sweet, delicate aroma
- > Firm and juicy
- > Good storage capacity and shelf life for an early variety
- > Productive, low vigour
- > **One picking time**

ASFARI

Harvest date

ASFARI

At a glance...

> Firmness: 7.6 kg, Brix: 13.1 %, Acidity: 7.8 g/l, Starch: 5

> Chilling requirement slightly higher than Nicoter

> Flowering time 1-2 days before Golden.

Pollinators: Delcorf, Granny, Pinova, Golden Gem, Golden Hornet, (Golden)

> Commercial license: worldwide, ABCz Group (www.abcz-group.com)

Based on the appearance this variety could be mistaken for an early Golden. But as soon as you bite into it, you will be happily surprised by its excellent eating qualities.

The taste of Asfari is well balanced sour-sweet with a delicate aroma. The texture is firm and juicy.

Even though Asfari is harvested more than a month before Golden, it can be stored relatively long.

Asfari is "something different" and opens up new possibilities in the range of early varieties.
